

MARWAN ABDELAZIZ HUSSEIN MOUSSA

Senior Software Quality Engineer | QA/QC Testing Specialist

Marwan.abdelaziz@yahoo.com | +20 100 705 6590 | linkedin.com/in/marwan-abdel-aziz-53177a143

Egypt • Open to Relocation: UAE, KSA, Qatar

PROFESSIONAL SUMMARY

Results-driven Senior Software Quality Engineer with 7+ years of experience delivering high-quality software across product-based and enterprise environments. Skilled in full-lifecycle software testing — from test strategy and design through execution, defect management, and release sign-off. Proven expertise in manual, mobile, API, and regression testing within Agile/Scrum teams. Dual ISTQB-certified, with a strong record of collaborating with cross-functional stakeholders to meet quality standards and business objectives. Actively seeking opportunities in the UAE, KSA, and Qatar where a quality-first engineering culture is paramount.

CORE COMPETENCIES & TECHNICAL SKILLS

Testing Types: Manual Testing • Regression Testing • Smoke Testing • System Testing • UAT Support • Mobile Testing • API Testing • Functional Testing • Integration Testing

Test Management: Test Planning • Test Case Design • Test Scenario Creation • Defect Lifecycle Management • Test Execution • Test Data Preparation • Bug Reporting & Triage

Tools & Platforms: Jira • Redmine • Postman • REST APIs • JSON/XML Validation

Methodologies: Agile • Scrum • SDLC • STLC • Release Management • Waterfall

Automation Knowledge: Selenium (Basic) • Page Object Model (POM) • Fluent Interface

Database & Other: SQL (Basic) • Database Testing • Web Testing • Cross-browser Testing

Certifications: ISTQB® CTFL • ISTQB® CT-MAT

Soft Skills: Stakeholder Collaboration • Attention to Detail • Analytical Thinking • Team Leadership

PROFESSIONAL EXPERIENCE

Senior Software Quality Engineer | VOM Jun 2023 – Present | Egypt

- Led and managed the QA team at VOM, overseeing task assignment, mentoring junior engineers, and ensuring consistent quality processes across all active projects and release cycles.
- Led end-to-end testing activities across the full STLC for web and mobile applications, ensuring delivery of stable, production-ready releases.
- Designed and maintained comprehensive test plans, test cases, and test scenarios derived from business requirements and user stories, increasing test coverage by standardizing QA documentation.
- Executed smoke, regression, and system testing across multiple release cycles, proactively identifying critical defects prior to production deployment.
- Conducted API testing using Postman to validate RESTful backend services and third-party integrations, identifying data inconsistencies and boundary issues.
- Managed the complete defect lifecycle in Jira — logging, prioritizing, tracking, and verifying fixes with development teams — reducing average defect resolution time through structured communication.
- Championed quality standards within Agile/Scrum ceremonies (sprint planning, daily stand-ups, retrospectives), influencing development practices and reducing post-release defect leakage.

Software Quality Engineer | Objects Nov 2021 – May 2023 | Egypt

- Developed and maintained a structured test repository aligned with QA best practices, reducing test preparation time across releases.
- Contributed to automated testing of critical business modules (Add to Cart workflow) using Selenium and the Page Object Model (POM), improving test maintainability and repeatability.
- Executed system, smoke, and regression testing across multiple product releases, consistently meeting sprint delivery deadlines.

- Performed comprehensive mobile application testing across Android and iOS platforms, identifying device-specific defects and UI inconsistencies.
- Tracked and resolved defects using Redmine, collaborating closely with developers to ensure timely fixes and accurate verification.

Software Quality Engineer | Innuva IT Solution Nov 2019 – Oct 2021 | Egypt

- Prepared detailed test plans and test cases for enterprise applications aligned with QA methodologies and project requirements.
- Executed multi-phase system, smoke, and regression testing for accounting and transactional modules, ensuring data integrity and business logic accuracy.
- Defined data quality testing strategies in collaboration with business stakeholders, ensuring accuracy of financial and transactional data outputs.
- Performed mobile testing and managed defect resolution workflows using Jira, maintaining clear traceability between requirements and test results.

Software Testing Engineer | Integrated Solutions Mar 2019 – Nov 2019 | Egypt

- Translated business requirements into executable test cases and test scenarios in line with QA standards.
- Performed comprehensive system and regression testing across multiple applications to validate functional requirements and ensure application stability.
- Collaborated with development teams to reproduce and verify defects, contributing to a measurable reduction in regression failures.

EDUCATION

Bachelor of Science (BSc) | Faculty of Science, Alexandria University, Egypt (2011 – 2015)

CERTIFICATIONS

ISTQB® Certified Tester – Foundation Level (CTFL) | International Software Testing Qualifications Board

ISTQB® Certified Tester – Mobile Application Testing (CT-MAT) | International Software Testing Qualifications Board

INDUSTRY EXPOSURE

Product-Based Systems • Enterprise Applications • Accounting & Transactional Modules • E-commerce Platforms
• FinTech • Mobile Applications
